

# San Jacinto Texas

HISTORIC DISTRICT

## PROJECT STARS

*This is the vision of Project Stars... We acknowledge we are not where we will be in five years but we have dared to dream. In doing so, we have chosen to embark on a long, sometimes difficult journey of collective thinking and consensus building between local communities, municipalities, state government and federal government. This map represents the district today and the stars represent future master plan enhancements.*

The district is approximately 226,567 acres in size. This is the 5th largest historical district in Texas and the largest in Harris County.
